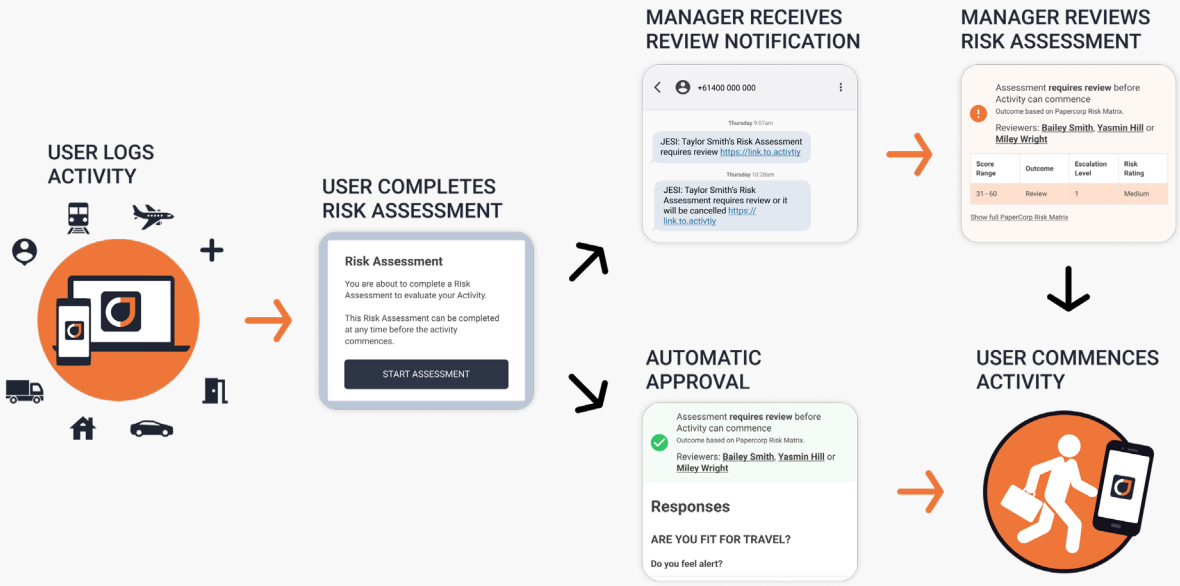
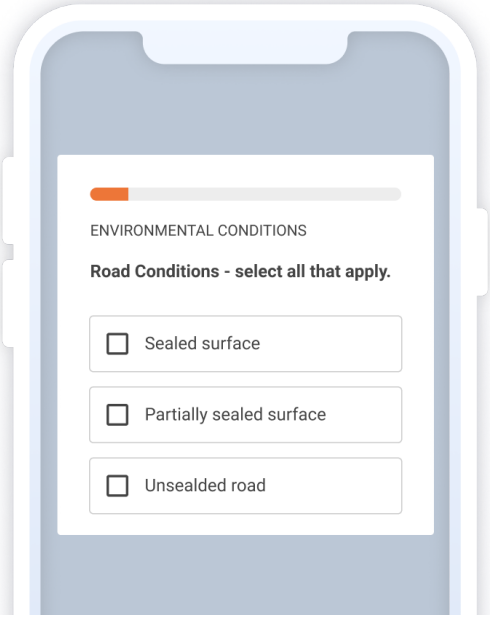
Digitised Risk Assessments

Risk Assessments identify high-risk situations and determine prevention and mitigation actions that can reduce the risk.

JESI has transformed the way Risk Assessments are administered, saving companies 1000s of hours in productivity improvements, completely removing paper form's and generating an auditable trail.





Driving Risk Assessments

Driving Risk Assessments can include questions that relate to Fatigue Levels, Road Conditions, Vehicle Distractions and the environment that will be travelled. Completely automating approvals for low risk, and medium to high risks requiring reviews.

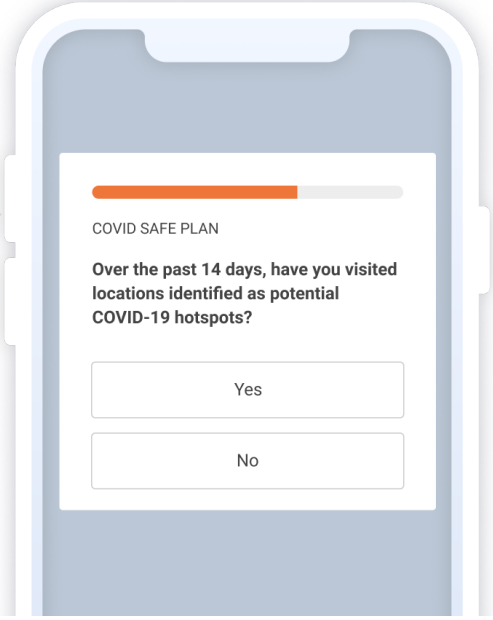
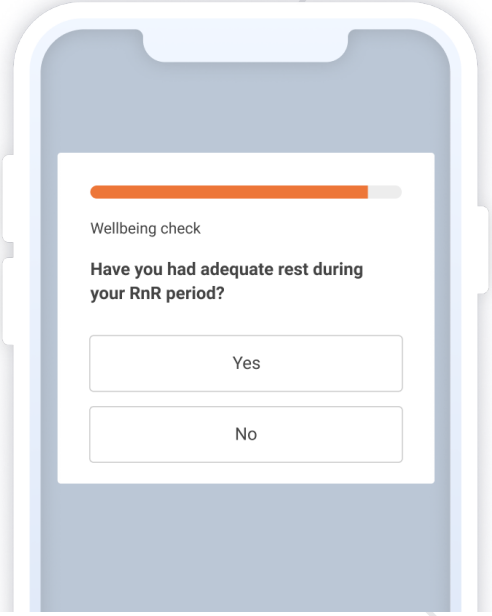
Working From Home Assessments

Working From Home Assessments ensure the extension of the workplace is adequately safe for workers to operate with the correct ergonomical equipment, physical and psychosocial hazards.



COVID Safe Plan

COVID Safe Plan is a digitised assessment that quickly identifies workers who have COVID related symptoms before arriving to work. It also records historical locations that highlights workers exposed to COVID hot spots.



Wellbeing Checks

Wellbeing Checks, provide a discrete, digitised management process for workers who may present with physical or psychosocial risks. If a risk is identified, a leader will be alerted by SMS and email.
