

# Working On-Site

Complete visibility while your workers are on-site

Do you lose visibility after your workers sign in to site?  
JESI alerts you if a worker misses a check-in and triggers an **automated escalation process**.  
Providing an **end to end** safety solution for your site.

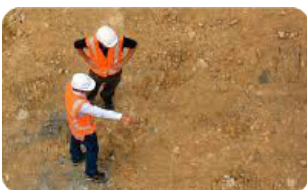

## Use Cases

Operating Heavy Machinery

Construction Projects

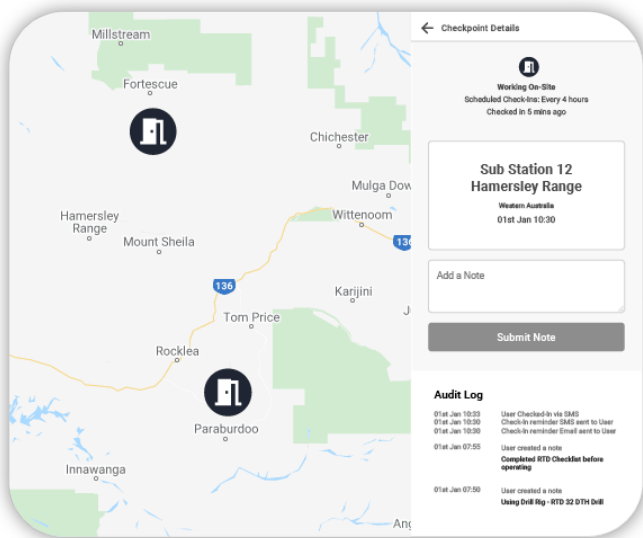

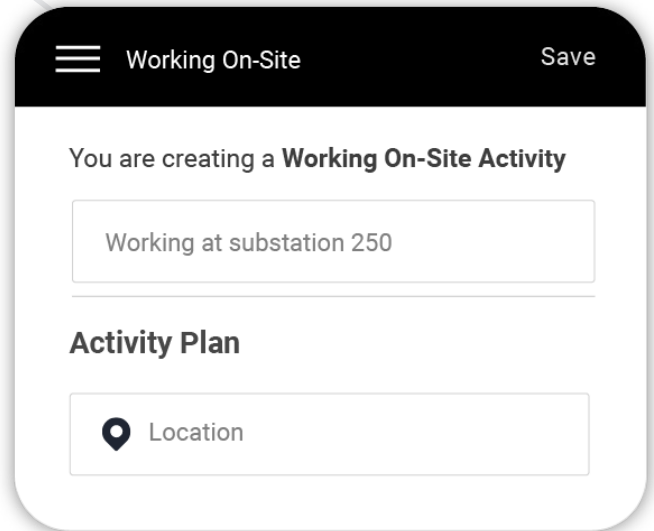

Site Inspection

Land Surveying

## Working On-Site Activities

Users create a Working On-Site Activity with Check-Ins at scheduled time intervals.

## Audit Log

Managers can use the centralised map to view all Workers On-Site and review Audit logs for more details of individual Activities.

## Dashboard & Analytics

Managers can search for Users that are currently Working On-Site using the Activity Dashboard like a digital people movement board.
